

ANNEX 1: MODEL GRAPHICS

Process L4-RDM-01-00-Reference Data Management Master Process

Abbreviations used: MSA EOL	Existing Specifications: Design Document for National Excise Applications - v3.12 L3 Reference Models: N/A	<h2 style="margin: 0;">Reference Data Management Master Process</h2> <p style="margin: 5px 0;">Process: L4-RDM-01-00 Version: 4.12</p> <p style="margin: 5px 0; font-size: small;">Type: BPMN collaboration diagram (BPMN 2.0) Version Date: 1 Mar...</p> <p style="text-align: right; font-size: x-small;">Legal (Business) Units in DG TAXUD: C2</p>	Assumptions: 1. The Excise Office List (EOL) is maintained conjointly with the Customs Office List (COL) by NCTS CS/RD. The NCTS CS/RD application offers the functionality of managing the data of those offices (maintenance, download, updates, and etc.). 2. According to DDNEA (Sub-section "V.1.2.1 Introduction" of "V.1.2 Exchange of Reference Data" in DDNEA v1.91), changes to the EMCS Reference Data are disseminated by SEED to each MSA according to their dissemination profile preferences. This is also in alignment with the current system behaviour, i.e. the IE734 is disseminated to the MSAs that are registered for receiving IE734 disseminations. However, in FESS (EBP UC-105-110 "Send reference data" of FESS v3.81 Section III), it is not clarified that, in the aforementioned scenario, SEED sends the IE734 only to the MSAs who are registered to receive IE734 disseminations.
